NumPy Exercises

Now that we've learned about NumPy let's test your knowledge. We'll start off with a few simple tasks, and then you'll be asked some more complicated questions.

Import NumPy as np

```
In [3]:
```

```
import numpy as np
```

Create an array of 10 zeros

```
In [8]:
```

```
np.zeros(10)
```

```
Out[8]:
```

```
array([0., 0., 0., 0., 0., 0., 0., 0., 0.])
```

Create an array of 10 ones

```
In [9]:
```

```
np.ones(10)
```

Out[9]:

```
array([1., 1., 1., 1., 1., 1., 1., 1., 1.])
```

Create an array of 10 fives

```
In [16]:
```

```
np.ones(10)*5
```

Out[16]:

```
array([5., 5., 5., 5., 5., 5., 5., 5., 5., 5.])
```

Create an array of the integers from 10 to 50

```
In [24]:
```

```
np.arange(10,51)
```

Out[24]:

```
array([10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50])
```

Create an array of all the even integers from 10 to 50

```
In [25]:
```

```
np.arange(10,51,2)
```

Out[25]:

```
array([10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50])
```

Create a 3x3 matrix with values ranging from 0 to 8

In [35]:

```
np.arange(9).reshape(3,3)
```

Out[35]:

```
array([[0, 1, 2],
[3, 4, 5],
[6, 7, 8]])
```

Create a 3x3 identity matrix

```
In [36]:
```

```
np.eye(3)
```

Out[36]:

Use NumPy to generate a random number between 0 and 1

```
In [40]:
```

```
np.random.rand(1)
```

Out[40]:

```
array([0.84780607])
```

Use NumPy to generate an array of 25 random numbers sampled from a standard normal distribution

```
In [41]:
```

Create the following matrix:

```
In [42]:
```

Create an array of 20 linearly spaced points between 0 and 1:

```
In [45]:
```

Numpy Indexing and Selection

Now you will be given a few matrices, and be asked to replicate the resulting matrix outputs:

```
Numpy Exercises
In [53]:
mat = np.arange(1,26).reshape(5,5)
mat
Out[53]:
array([[ 1, 2, 3, 4, 5],
       [6, 7, 8, 9, 10],
       [11, 12, 13, 14, 15],
       [16, 17, 18, 19, 20],
       [21, 22, 23, 24, 25]])
In [39]:
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
In [54]:
mat[2:,1:]
Out[54]:
array([[12, 13, 14, 15],
       [17, 18, 19, 20],
       [22, 23, 24, 25]])
In [29]:
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
In [57]:
mat[3][4]
Out[57]:
20
In [30]:
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
In [62]:
mat[:3,1:2]
Out[62]:
```

array([[2],

[7], [12]])

```
In [31]:
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
In [63]:
mat[4,:]
Out[63]:
array([21, 22, 23, 24, 25])
In [32]:
# WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
# BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
# BE ABLE TO SEE THE OUTPUT ANY MORE
In [64]:
mat[3:5,:]
Out[64]:
array([[16, 17, 18, 19, 20],
       [21, 22, 23, 24, 25]])
```

Now do the following

Get the sum of all the values in mat

```
In [67]:
mat.sum()
Out[67]:
325
```

Get the standard deviation of the values in mat

```
In [69]:
mat.std()
Out[69]:
7.211102550927978
```

Get the sum of all the columns in mat

```
In [73]:
mat.sum(axis=0)
Out[73]:
array([55, 60, 65, 70, 75])
```

Great Job!
